

COMPUTER ACCESS AND USE

INTERNET SAFETY

The Internet is a vast, global computer network that provides access to major universities, governmental agencies, other school systems, and commercial providers of data banks. The Evangeline Parish School Board shall establish appropriate guidelines for exploring and using Internet resources within the school district to enhance learning and teaching activities. Acceptable use of these resources shall be consistent with the philosophy, goals and objectives of the Evangeline Parish School Board. In addition, all elementary schools, beginning with the third grade, and all secondary schools shall provide instruction for educating children regarding Internet safety.

In its continued efforts to comply with the *Children's Internet Protection Act*, the District shall adopt and enforce a policy of Internet safety that incorporates the use of computer-related technology or the use of Internet service provider technology designed to block or filter Internet access for minors and adults to certain visual depictions, including without limitation those that are obscene, child pornographic, or harmful to minors, including without limitation sites that are excessively, violent, pervasively vulgar, or sexually harassing. Sites which contain information on the manufacturing of bombs or other incendiary devices shall also be prohibited. Only authorized persons may disable for an adult user the blocking or filtering mechanism in order to enable Internet access for bona fide research or other lawful purposes, which shall include online services for legitimate scientific or educational purposes approved by the Board, or access to online services of a newspaper with a daily circulation of at least 1,000.

In addition to filtering requirements, the Board shall maintain regulations which:

- Prohibit access by minors to inappropriate matter on the Internet and World Wide Web;
- Address the safety and security of minors when using electronic mail, chat rooms, and other forms of direct electronic communications, such as "Instant Messaging;"
- Prohibit unauthorized access, including what is now known as "hacking" and other unlawful on-line activities by minors online;
- Prohibit unauthorized disclosure, use, and dissemination of personal information regarding minors; and
- Institutes measures designed to restrict minors' access to materials harmful to minors.

Guidelines are provided so that Internet users are aware of the responsibilities they are about to assume. Responsibilities include efficient, ethical, and legal utilization of network resources. The student and parent or guardians shall sign an *Acceptable Use of Computers and Internet Agreement*, which shall be required before any student will be allowed to use school system computers. The student and parent/guardians signatures shall be **legally binding** on all parties and shall indicate they have read the terms and conditions carefully and understand their significance.
